Fake live video call

Fake live video call on whatsapp. How to make a fake live video call. Fake live video call app. Fake chat blackpink with live video calling.

Hi Android users, today we talk about Fake Cam Chat which is also possible on Android. In short, we can say that we play video instead of our movement, during a video chat on Android no matter where our chat is happening as Messenger, Skype, WhatsApp or any other. This way works for all video chat services because here the system changes the source of the front camera on a predefined video. So the next user thinks this is actually happening, but no, this is the pre-registered video that saw Android mobile screen at that time. How, you know this activity is easily possible on the desktop environment meaning on Windows OS like Windows 7, Windows 8 and Windows 10. Many software available for the Windows operating system that allows you to set a Premade video as a video song / movie or Your clip during the video chat. So you can easily change and check what the next person saw on his screen. The same thing we do here on our mobile Android. This will work on all the latest Android versions no matter that it's Android Kitkat, Android Lollipop, Android Marshmallow, Android Nougat. So if you want to push your front phone cam on Android, surely you need an app that allows you to push your front cam during the video chat (Messenger / Android Mobile Skype / WhatsApp). This is the really easy activity that you just have to touch the option of the front camera and see a available option that browses to the files selects the video file and did. Now, whenever the video call starts on your device this video playback instead of owning your front cam actions. How to work in false front cams during the video chat on Android: in normal video call, you can see your activities on your screen. Let's suppose what happens if you call it and you see another person you have not known or see a video of songs or a recorded clip, so maybe your friends using a false cam app or shake your front cam of your Android phone . So if you also want to take an experience of the false front cams on your Android phone, you can enjoy this service. This will work on Android OEMS, no matter that both Samsung, OnePlus, Xiaomi, Huawei, Oppo, Vivo, Micromax, Lava, HTC, LG, Sony etc. Download App for Front Fake Cam for Android Gooole PlayStore: you need a third-party app to push your front cam activities. So go to Google Play Store and Search App Face Front Cam Many apps appear on the screen download the best app. Please consult evaluations and reviews before downloading an app. Download the front cam fake app from Google Play Store, so now you can enjoy the à €
